The Productivity Devices Company

Design Engineer

Vektek is a market leading designer and manufacturer of highly-engineered workholding products including hydraulic clamps, work supports, cylinders, valves, and hydraulic power supplies. Vektek has grown to become a top supplier for the automotive, heavy equipment and aerospace industries. Vektek products are backed by the largest factory-direct customer service team in the industry. For additional company information, please visit www.vektek.com.

Summary of Position:

- Vektek is looking for a self-motivated Design Engineer to research, design and test new products, make revisions to our current product line and make recommendations for changes in product and test methods while maintaining the integrity of the product. Our Design Team is responsible for ensuring product meets industry, customer and corporate requirements and provides technical assistance to suppliers.

Required Qualifications:

- Bachelor's degree in Mechanical Engineering.
- Proficient understanding of design and simulation software, PTC CREO, Windchill, SolidWorks, 3-D CAD experience, FEA, Microsoft Office, etc.

Desired Qualifications:

- 5+ years of comprehensive knowledge of mechanical design and analysis, engineering, testing, and/or manufacturing processes related to products.
- Industry-proven design skills as well as the ability to manage multiple projects simultaneously.

Qualified applicants are encouraged to mail résumé with desired wage to:
