Air Sensing Control Kit

NEW Air Sensing Control Kit for Pneumatic Confirmation Systems

- Adjustable air pressure and flow gives you the ability to monitor most confirmation valves, part present or clamp position systems.
- Easy electronic pressure switch adjustment with 2 PNP* digital set points and 1 analog output to meet your specific needs.
- Can be used with Pallet Decouplers, Pneumatic Confirmation Valves, Part Present Sensing Work Supports or self-made part location orifices.
- Ready-to-use kit with everything you need to feed back a confirmation signal of your choice!

Air Sensing Control Kit

Model No.	Max Air Pressure (psi)	Operating Pressure Range (psi)	Max Air Flow Rate (SCFM)	Filtration Element (micron)	Power Supply (VDC)	Power Consumption (mA)	2 Digital Contacts	1 Analog Output
50-8240-00	200	0-25	12	5	15-32	50	N/O or N/C	0-10V or 4-20 mA

* For NPN applications order signal converter cable 27-84200-00.
